Subject: Microsoft case

We recommend that the proposed compromised settlement of the microsoft case be approved. This will provide many opportunities for seniors to have the privilege of using the internet. We have webtv.net and are able to communicate with our family and friends across North America as well as any place in the world. Also, many helps for health and life information are very helpful. We can be connected with the whole new world.

Thank you in advance for your consideration.

F.D.Ketner
